#### ANNOUNCEMENTS

---

##### NEW USERS LICENSES

Nathaniel announced upcoming changes to HMIS user licensing. They explained that the COC and OHCS were implementing new policies to ensure licenses are used effectively. The changes were driven by the need to manage the finite number of expensive licenses provided by OHCS.

Key points included:

- Agencies will need to justify license requests more thoroughly

- Inactive licenses may be deactivated after a certain period
- The goal is to allocate licenses to those actively using the system
- Details will be shared in an upcoming email to all users

Nathanial emphasized this was not meant to discourage license requests, but to improve overall system utilization.

---

## TRAINING ACADEMY

Nathanial provided updates on HMIS training:

- Trainings will be held the first week of each month
- Users should contact the help desk to schedule training
- Agencies need to request training within that week or wait until the next month
- New users must complete training before accessing HMIS
- Refresher trainings will be held the last month of each quarter
- Additional trainings on reports and street outreach data entry are planned
- License requests will only be accepted on Tuesdays and Thursdays

---

## OMC UPDATES

No specific discussion occurred for this agenda item.

## PIT/HIC UPDATES

Abby presented the latest Point-in-Time (PIT) count data:

- Total homeless count for 2025: 2,221 individuals
- This includes sheltered and unsheltered counts
- Emergency shelter numbers increased due to new programs
- Unsheltered count increased from 878 to 945 since the last full count
- Transitional housing saw a slight increase

- Safe Haven beds increased from 5 to 20 individuals

Abby noted this data would be presented to the board and PIT/HIC workgroup. She mentioned HUD has not yet opened submissions, so minor changes may still occur. Abby thanked everyone for their efforts in verifying data and running reports.

Next steps include:

- Creating demographic breakdowns
- Analyzing housing inventory information

## SPM UPDATES

David and Abby provided updates on System Performance Measures (SPMs):

- The process has been challenging due to data tracking issues
- SPMs focus on 7 years of historical data
- Measures include length of homelessness, returns to homelessness, income changes, and exit destinations
- Tens of thousands of errors were found, particularly in street outreach data
- This year's data will serve as a baseline for improvement
- The team is resubmitting FY 2023 data due to recent data cleanup efforts
- SPMs use a 2-year lookback period for returns to homelessness
- Accurate exit destination data is crucial for future reports
- Street outreach data is included regardless of client engagement status
- The group will review and potentially adjust data quality benchmarks

David emphasized the importance of ongoing data quality checks throughout the year to reduce the burden of annual cleanups.

## Q & A

During this section, attendees asked various questions:

- A participant requested a template for accurately capturing homeless time frames
- Another asked about including client names in data quality reports for easier review
- There were discussions about the possibility of agencies running their own reports with identifiable information

Alliance staff encouraged attendees to reach out with questions between meetings and offered to provide office hours for report assistance. They emphasized their openness to addressing all types of questions and concerns.

## DISMISS MEETING

Meeting adjourned by Nathaniel Perez at hh:mm3:30 p.m.
