5/29/2022	e-snaps	<p>1G - HUD 2880: I reached out for TA from HUD and followed their instructions to edit the HUD2880 form in our Applicant Profile which is what populates the project application. However, it is not updating the project application. I will reach out again for TA as it seems like a technical issue with e-snaps.</p> <p>3A - Project Detail, question #2: This is a drop down question that asks us to fill out the name of the collaborative applicant but there are no options to choose from. It appears that there needs to be a link between Mid-Willamette Valley Homeless Alliance as the collaborative applicant. I will reach out to e-snaps about this as well.</p> <p>Special YHDP Activities: Even though I have selected "no", it still shows as incomplete. I will reach out to e-snaps TA for help.</p> <p>My question is: if we are unable to get these esnaps TA issues resolved by the deadline, can we still submit? Is there flexibility to keep working through the esnaps technical issues through the collaborative application process? The rest of our application is complete and ready for submission.</p>	<p>Technical issues with e-snaps will not prevent you from submitting your application. Any technical issues with e-snaps should be noted when you submit the PDF of your application and other required materials to Lisa Trauernicht.</p>
